

Tasktop Integration Hub

Collaborate across teams with integrated tools for better, faster product delivery.

Overview

Jama seamlessly connects with the most popular developer tools to store all product information in one central repository, with real-time data synchronization.

Key Integrations

Atlassian JIRA

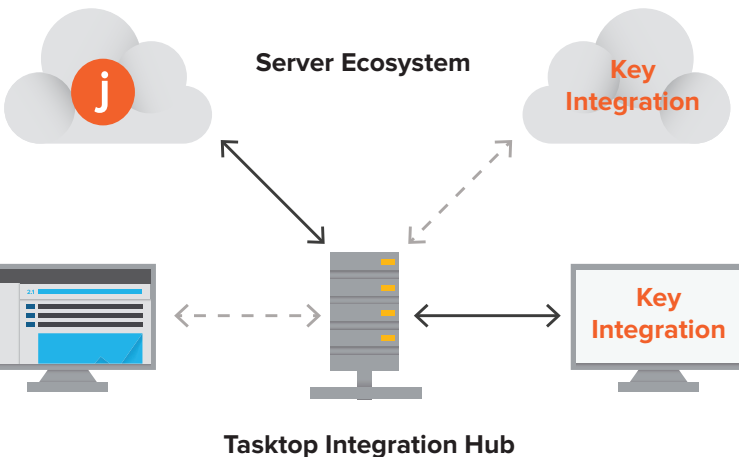

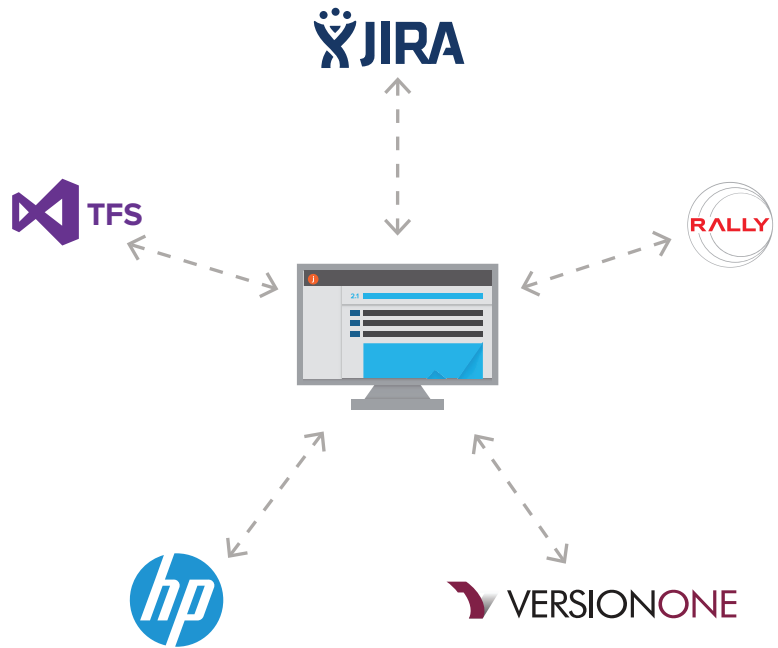

Team Foundation Server (TFS)

Rally

HP Quality Center (HPQC)

VersionOne

Tasktop Integration Hub

Configured to your process

The Tasktop Integration Hub runs on a dedicated server or VM. On-Premise and Cloud Hosted instances of Jama or key integrations can be connected through the Hub.

Tasktop Integration Hub (TIH) Supported Applications

Tools:

Atlassian JIRA, HP ALM, HP Quality Center, Jama, Microsoft TFS, Rally, VersionOne

System Requirements

TIH must run on a separate standalone server or VM with the following system requirements:

Hardware Requirements:

- 8+ GB system memory
- (2) 3 GHz processors, 4 cores total
- 250 GB free disk space

Operating System (64-bit only):

- Windows 7 SP1

- Windows Server (2008 R2 SP1, 2012 R2, 2012)
- Red Hat Enterprise Linux 6.x
- Ubuntu Linux (12.04 LTS, 14.04 LTS)
- SUSE Linux Enterprise Server (11.x, 12.x)

The TIH runs on a file-based database. This database is created within a workspace for the profile of the user account that is running the application. For this reason, you must create a single admin user account on the machine running TIH that can be accessed by all admin that would be configuring the TIH.

An admin or multiple admin should be identified to handle the following tasks:

- Configuring the initial mappings for the TIH
- Using Jama and other connecting endpoints
- Maintaining the connector and mappings

Jama Software is the product development platform for companies building complex, smart and connected products. The Jama solution enables enterprises to accelerate development time, mitigate risk, slash complexity and verify regulatory compliance. More than 600 product-centric organizations, including NASA, Thales and Caterpillar, use Jama Software to modernize their process for bringing complex products to market.
